

Vasyl Kuzma

Frontend Developer | React Specialist

I am an enthusiastic Frontend Developer specializing in React, with a strong foundation in JavaScript and TypeScript. My goal is to create scalable, high-performance web applications that provide excellent user experiences. I am passionate about continuous learning and actively contribute to open- source projects.

Technical Skills

- React (Hooks, Redux)
- JavaScript / TypeScript
- HTML5 / CSS3 (SCSS, Responsive Design)
- Node.js
- MongoDB
- Git / GitHub
- VS Code

Soft Skills

- Attention to detail
- Teamwork & Collaboration
- Problem Solving
- Creativity & Critical Thinking

Languages

- English - A2 (Pre-Intermediate)
- Ukrainian - C1 (Native)
- Russian - B2 (Fluent)
- Czech - A2 (Pre-Intermediate)

Work Experience

Novares Group, Czech Republic

Operator - Inspector - Master - Electrotechnician (2020 - 2023)

Progressed through various roles, including quality control, team management, and electrical maintenance.

Yazaki LLC, Ukraine

Operator (2018)

Maintained smooth operation of assembly lines, performing quality checks and ensuring production efficiency.

Lecturer Assistant, University of Physics

Junior Lecturer (2015 - 2019)

Assisted with lectures, guided research, and led practical lab sessions.

Education

Fullstack Developer Course (2023 - 2024)

GoIT Global

Successfully completed a comprehensive Fullstack development course covering frontend and backend technologies such as HTML, CSS, JavaScript, React, and Node.js. This program provided in-depth training in creating scalable web applications and mastering modern development practices.

Certificate issued by CEO of GoIT

Ph.D. in Physics

Uzhgorod National University, 2012 - 2015

Completed postgraduate studies with a focus on advanced physics research. Gained deep expertise in both theoretical and experimental physics.

Bachelor's and Master's in Physics

Uzhgorod National University, 2007 - 2012

Obtained both Bachelor's and Master's degrees in physics. Developed a solid foundation in various branches of physics, from classical mechanics to quantum physics.

Projects

- [WebStudio](#) - A professional website for a WebStudio company featuring responsive design, transform effects, and modal windows. Role: Developer. Individual project.
- [Best Sellers Books](#) - A dynamic website for a book product company with adaptive design, animations, modal windows, and a burger menu for ordering. Role: Scrum Master, Developer of the All Categories Section.
- [Movie Search](#) - A movie search application with routing to search for movies by title. Implemented advanced state management and optimized API interactions. Role: Sole Developer. Individual project.
- [Contacts Book](#) - A "Contact Book" application with registration and login functionalities, managing a private collection of contacts. Utilized secure authentication and optimized data handling.
- [Trecker of Water](#) - A "Contact Book" application with registration and login functionalities, managing a private collection of contacts. Utilized secure authentication and optimized data handling.

Pro Bono Projects

- [TaisiyaStyle](#) - Developed TaisiyaStyle.com, a personal website for a hairdresser using React, featuring responsive design and an intuitive booking form. Currently working on the backend with MongoDB to enable appointment scheduling.
- [Sweet-Pop](#) - Developed and implemented a landing page for a game using HTML, CSS (Sass), and JavaScript. Collaborated with a team to create an attractive design and user-friendly interface. Optimized the site for loading speed and responsiveness across various devices.
